

THE BENEFITS OF MICROSEAL *are the ones you'll never see.*

MicroSeal is a fiber and fabric protectant that's been used worldwide for over 30 years. Its many benefits include:

Environmentally Safe

EPA-rated safe, non-toxic, and non-allergenic;
California VOC compliant

Permanent Stain Resistance

Protects all fabrics and fibers from permanent
stain damage and will endure frequent
professional cleanings

Will Not Alter Colors or Textures

Utilizes proprietary nanotechnology; colors
and textures remain unchanged

Penetrates & Seals All Fiber Types

Wools, cottons, silks, synthetics, suedes,
and most smooth-finished leathers

Permanent Sun Fade Resistance

Nearly 100% protection on most fabrics, carpeting,
and cherished rugs

Can Be Applied with Confidence to Heirloom Fabrics & Fibers

Will not seal in existing soil or stains

Extends Lifespan

Strengthens all fabrics & fibers
while bolstering wear integrity

Tested & Proven by Independent Laboratories

Boeing Aerospace in Seattle • Chatfield Applied
Research Labs in London • Commercial Testing
Company in Georgia • Certified Testing Labs in
Georgia • Centre D-Essale Aeronautique de
Toulouse in France • Forensic Testing Labs in
Georgia • U.S. Testing Company in
Los Angeles • TRI/Environmental Inc. in Texas

A RELATIONSHIP THAT'S *to your benefit.*

FABRIC & FIBER PROTECTION
THAT IS SAFE ENOUGH FOR ALL

your treasures.

THE PERMANENT
PROTECTANT.
NON-TOXIC,
NON-ALLERGENIC
& non-worry.

YOU'VE GOT EVERYTHING PERFECT.

Now keep it that way.

Your home, vehicle, boat and airplane are significant lifestyle investments. Keeping their fabrics, carpeting and other fibers safe from stains, sun fade, and even excessive wear isn't something you want to worry about. That's why protecting them with MicroSeal is a smart decision. It's the industry-leading protectant that actually seals and protects from the inside out.

ENGINEERED TO PROTECT.

Designed to be safe.

MicroSeal was created in England over thirty years ago as a proprietary formula intended to permanently replenish the naturally-protective properties that a sheep

produces for its own coat. Unlike the typical protectant that only coats the fiber and then breaks up easily, it penetrates the fiber to its inner core and protects from the inside out. In addition to wear and stain protection, MicroSeal provides substantial sun fade resistance and the environmentally-friendly formula is completely biodegradable and is medically rated non-toxic

IT'S AN INVESTMENT worth comparing.

When considering MicroSeal vs. other fabric and fiber protectants, find out if they offer these advantages:

- Penetrates fibers & survives for years of protection.
- Independent laboratory verification that it reduces sunfading by nearly 100% on most fabrics.
- Won't shrink or stain fabrics and fibers.
- Increases wear resistance.
- Reduces smoke density and flame spread if fabric or fiber catches on fire.
- Mildew and static resistant.
- Attaches only to fibers and will not seal in stains.
- Does not damage woodwork, metal, paint or glass.
- Safe for the environment.
- Can be used on any material with fibrous nature including suedes and smooth-finished leathers.
- Is non-allergenic and non-toxic.

MICROSEAL PROTECTS

more than you'll believe.

MicroSeal is the specially-formulated protectant that can be applied to a variety of products. It provides fabric and fiber protection to:

Carpeting

Protect your investment from the very start
